

**SANDRA S.**

# STATE

First up is a wash and condition to get rid of any dirt and bacteria that may hinder the treatment's effectiveness. This is followed by the application of an anti-dandruff treatment with active ingredients and amino acids to reduce itching and irritation with gentle exfoliation. Designed to work on repairing damage and strengthening hair fibers, Next, a mild moisture is used to keep the hair supple and shiny. Finally, a keratin protein is applied to seal in the treatment and prolong its effects. Each step in the Tribute Smooth Double Fix
